Maris' amazing first project

We have been fortunate and impressed to see the end result of some very hard work by Glasscraft regular Maris... a student of Di 's (Eltham Living and Learning)

We thought we would share these quick pics with you. Maris used a beautiful selection of transparent and wispy opalescent glass and lots of faceted jewels to create this beautiful "sectioned" panel (the bottom photo clearly shows how amazing the glass looks with the sun streaming through) ..the panel has since been installed in his home as a sidelight..

Maris has now started on his next panel (a tropical scene with two colourful parrots centre stage) we look forward to seeing the results!
